* Based on Babies Can't Wait state database. All percentages have three components, which are numerator, denominator and quotient. In the above chart there are three equations (A,B,C). "On Time" is the numerator, "Total # Exiting Part C" is the denominator and "%" is the quotient. Either component may have any number of sub-components. In the above example "Total Exiting Part C" has two sub-components (Total Clients, Missing Transaction Date). On Time has one sub-component (Delayed Family Reasons) and one miscellaneous piece of data (Delayed Other Reasons).

This indicator is addressed more fully in the State Performance Plan (SPP) and the Annual Performance Report (APR)
